

Connect and trade with multiple banks via a single API or GUI

FXSpotStream GUI

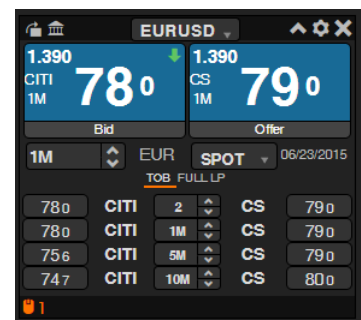

Trade from your browser with pricing from thirteen global Liquidity Providers with no Transaction Fees or Commissions for Price Takers

Key Benefits

The GUI is based upon HTML5 technology which allows it to be launched directly from your browser* without any need to download software onto a local PC/network

- Trade FX Spot, Outright Forwards, Swaps and NDF/NDS and Precious Metals Spot and Swaps on a single screen with Executable Streaming Prices (ESP) and Request for Stream (RFS) basis
- Build multiple spot widgets on multiple tabs with individual widgets to place around your desktop for an efficient use of space
- FX Swaps are available on an RFS basis, allowing you to trade both even and uneven Swaps through any date your Liquidity Providers permit, using our quick tenor or broken date functionality
- Build and view a Swap Curve, choosing your tenors up to 18M. This allows you to see best price for each tenor selected

Top of Book

The FXSpotStream GUI is able to integrate with all post-trade STP channels. We also provide trade reports to download into Excel for your records and Drop Copy notifications via email.

*Browser Requirements, Windows: Chrome 48.0.2564 or higher

Key Features

- Trading Streaming (ESP) FX in Spot, Outright Forwards, NDFs and Precious Metals Spot and Forward in two distinct methods:
 - Top of Book (TOB) – see the best bid/offer for your chosen notional in addition to showing the depth of liquidity from your providers
 - Full Liquidity Provider (LP) – see the best bid/offer from each provider for your chosen notional
- “Favorite Market” panel that will show your preferred currency pairs streaming separately with a quick-link to trade
- Build and view a Swap Curve, choosing your tenors up to 18M. This allows you to see best price for each tenor selected
- Order types supported are Limit Orders, FOK, ‘slippage,’ IOC/Partials and VWAP
- User-defined preferences include:
 - Designation of Prime Broker to directly send give-up notification
 - Option to limit amounts traded at global or currency pair level
 - For Streaming trading you can enable IOC style which allows the possibility of a partial fill
 - Light or Dark skin selection

About Us

FXSpotStream provides a multibank FX streaming aggregation and a matching service supporting trading in FX Spot, Forwards, Swaps, NDF/NDS and Precious Metals Spot and Swaps. Banks connected to FXSpotStream’s streaming aggregation venue serve as Liquidity Providers to clients. FXSpotStream’s streaming aggregation service functions as a market utility, providing the infrastructure to facilitate multibank trades from clients to Liquidity Providers. Clients access a GUI or single API from co-location sites in New York, London and Tokyo and have the potential to communicate with all Liquidity Providing banks connected to the FXSpotStream. FXSpotStream’s streaming aggregation venue does not charge brokerage fees to clients or Liquidity Providing banks.
